91%

SKILLS

- Fully Equipped in C++ ,Data Structures And Algorithms and Machine Learning
- Proficient in Computer Fundamentals such as Database Management Systems and Operating Systems.
- Familiar with Javascript, Frontend Development and Backend Development

PROJECTS

- **Customer Care**
Two ML models where one of them is a classic sentiment analyser and helps retailers differentiate in demand and good products from another.
Second model works on a dataset of expenditure by customers and gives a loyal customer base which the retailers need to focus on more.
- **Stock Stream**
A website where you can get daily updates on your portfolio of stocks and also valuable information to aid you in your stock market journey.
